## 2 Estimating Cost Components

Once categorized you need to estimate each components cost This often involves Market Research Checking prices from suppliers competitors or online marketplaces Historical Data Analyzing past project costs if available Expert Opinions Consulting with experienced professionals for complex estimations Contingency Planning Adding a buffer usually 10-20% to account for unforeseen expenses Example Lets say youre estimating the cost of building a simple website

Category	Item	Cost
Direct Costs	Web design	2000
	development	3000
	hosting 100year	100
Indirect Costs	Project managers time 20 hours	500
	50hour	1000
<b>Total Estimated Cost</b>		<b>6100</b>

plus yearly hosting 3

## 3 Using Estimation Techniques

Several techniques can enhance accuracy

### Bottomup Estimation

Breaking down the project into smaller tasks and estimating each individually This is highly detailed but can be timeconsuming

### Topdown Estimation

Using historical data or analogies to estimate the overall cost Less detailed but faster

### Threepoint Estimation

Using optimistic pessimistic and most likely cost estimates to calculate a weighted average This accounts for uncertainty

## Part 2 Understanding Valuation

Valuation is a broader field applicable across various assets Key approaches include

- 1 Market Approach This involves comparing the asset to similar ones that have recently been sold Its most reliable for assets with liquid markets eg stocks real estate
- 2 Income Approach This focuses on the future income generated by the asset Its commonly used for valuing businesses or rental properties Key methods include Discounted Cash Flow DCF analysis
- 3 Asset Approach This values the asset based on the net asset value NAV the difference between its assets and liabilities Its often used for valuing companies with significant tangible assets
