this is the third edition of the widely acclaimed and successful casebook on contract in the ius commune series developed to be used throughout europe and beyond by anyone who teaches learns or practises law with a comparative or european perspective the book contains leading cases legislation and other materials from english french and german law as the main representatives of the legal traditions within europe as well as eu legislation and case law and extracts from the principles of european contract law comparisons are also made to other international restatements such as the vienna sales convention the unidroit principles of international commercial contracts the draft common frame of reference and so on materials are chosen and ordered so as to foster comparative study complemented with annotations and comparative overviews prepared by a multinational team the third edition includes many new developments at the eu level including the ill fated proposal for a common european sales law and further developments linked to the digital single market and in national laws in particular the major reform of the french code civil in 2016 and 2018 the uk s consumer rights act 2015 and new cases the principal subjects covered in this book include an overview of eu legislation and of soft law principles and their interrelation with national law the distinctions between contract and property tort and restitution formation and pre contractual liability validity including duties of disclosure interpretation and contents performance and non performance remedies supervening events third parties

the advent of multimedia technology is creating a number of new problems in the fields of computer and communication systems perhaps the most important of these problems in communication and certainly the most interesting is that of designing networks to carry multimedia traffic including digital audio and video with acceptable quality the main challenge in integrating the different services needed by the different types of traffic into the same network an objective that is made worthwhile by its obvious economic advantages is to satisfy the performance requirements of continuous media applications as the quality of audio and video

streams at the receiver can be guaranteed only if bounds on delay delay jitters bandwidth and reliability are guaranteed by the network since such guarantees cannot be provided by traditional packet switching technology a number of researchers and research groups during the last several years have tried to meet the challenge by proposing new protocols or modifications of old ones to make packet switching networks capable of delivering audio and video with good quality while carrying all sorts of other traffic the focus of this book is on heits the heidelberg transport system and its contributions to integrated services network design the heits architecture is based on using the internet stream protocol version 2 st ii at the network layer the heidelberg researchers were the first to implement st ii the author documents this activity in the book and provides thorough coverage of the improvements made to the protocol the book also includes coverage of heitp as used in error handling error control congestion control and the full specification of st2 a new version of st ii the ideas and techniques implemented by the heidelberg group and their coverage in this volume apply to many other approaches to multimedia networking

this was the first conference jointly organized by the ifip working groups 6 2 6 3 and 6 4 each of these three working groups has its own established series of conferences working group 6 2 sponsors the broadband communications series of conferences paris 1995 montreal 1996 lisboa 1997 stuttgart 1998 and hong kong 1999 working group 6 3 sponsors the performance of communication systems series of conferences paris 1981 zürich 1984 rio de janeiro 1987 barcelona 1990 raleigh 1993 istanbul 1995 and lund 1998 working group 6 4 sponsors the high performance networking series of conferences aaren 1987 liège 1988 berlin 1990 liège 1992 grenoble 1994 palma 1995 new york 1997 vienna 1998 it is expected that this new joint conference will take place every two years in view of the three sponsoring working groups there were three separate tracks one per working group each track was handled by a different co chairman specifically the track of working group 6 2 was handled by ulf k rner the track of working group 6 3 was handled by ioannis stavrakakis and the track of working group 6 4 was handled by serge fdida the overall program committee chairman was harry perros and the general conference chairman was guy pujolle a total of 209 papers were submitted to the conference of which 82 were accepted each paper was submitted to one of the three tracks

technical theory key technologies and practical applications for consortium blockchains with a solution to the cap trilemma problem principles and applications of blockchain systems provides a comprehensive introduction to consortium blockchains including the physical network consensus and contract layers covering technical theory key technologies and practical
